DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-12, and 47-50 are rejected under 35 U.S.C. 102(e) as being anticipated by PG-PUB 2005/0113842 to Bertagnoli et al.

Bertagnoli discloses a tool for preparing vertebral bodies for an implant, the tool comprising a cutter body having a thickness dimension to distract the upper and lower vertebral bodies apart a distance to receive the implant (FIG. 25); a first cutting blade protruding upwardly from the cutter body and adapted to cut a groove in the upper vertebral body; and a second cutting blade protruding downwardly from the cutter body and adapted to cut a groove in the lower vertebral body (blades 330), wherein the first and second cutting blades are parallel to one another; wherein the second cutting blade is spaced from the first cutting blade by the thickness dimension of the cutter body (Paragraphs 0078-0081).

Bertagnoli also discloses that the blade may have a protective element (Paragraph 0083).

Bertagnoli also discloses that the structure of the device is made to avoid impinging the nerves (Paragraph 0085).

Response to Arguments

3. Applicant's arguments filed 21 December 2005 have been fully considered but they are not persuasive.

4. Applicant argues that Bertagnoli et al '842 does not disclose In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., multiple chisels) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

5. In response to applicant's argument that Bertagnoli et al 842 does not disclose "designed to position two grooves into the upper vertebral body at the same time it positions two grooves in the lower vertebral body so that they do not damage the cauda equine as shown in Fig. 5A....", a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

6. Applicant argues that Bertagnoli does not disclose that the blades are parallel to the handle. Bertagnoli clearly shows that the blades and handle are parallel since all these elements are parallel to the same axis. Therefore, they are also parallel to each other and to the handle.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

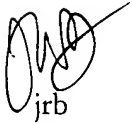

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
